

The Sustainability Cloud **DIGEST**

Enterprise software platform for ESG and climate action.

Dear Reader,

We're closing 2025 with two months of rapid movement across climate regulation, carbon markets, and industrial sustainability. India tightened compliance with new CPCB mandate while CBAM updates from Europe are coming with lightning speed.

Globally, COP30 set an ambitious \$1.3 trillion climate finance goal, and major corporations announced multi-billion-dollar investments in low-emission logistics, green manufacturing, and clean energy transitions.

As we wrap up the year, here is your combined **November–December Sustainability Brief**, and [warm wishes for a Merry Christmas and New Year 2026](#).

Happy Reading!
