

The Sustainability Cloud **DIGEST**

Enterprise software platform for ESG and climate action.

Dear Reader,

2026 begins with a clear signal: sustainability is no longer voluntary it's operational.

From **CBAM going live to India accelerating carbon markets and clean tech investments**, this year will define how industries measure, report, and compete on emissions performance.

For businesses, climate action is now directly tied to market access, trade, and capital.

Here's your **first Sustainability Brief of the year**, curated to help you start 2026 informed and ahead.

Happy Reading!
