

# The Sustainability Cloud **DIGEST**

Enterprise software platform for ESG and climate action.

Dear Reader,

## **This February, sustainability moved deeper into the core of trade, policy, and infrastructure.**

India's evolving trade negotiations with the European Union are bringing ESG compliance into the spotlight, ignalling that market access will increasingly depend on environmental and reporting standards. At the same time, the Union Budget 2026–27 reinforced climate as infrastructure, with strong signals toward carbon markets, clean energy, and green industrial growth.

**Happy Reading!**
